

OFFICE OF THE GOVERNOR
STATE OF MONTANA

Steve Benson
Governor

Mike Cooney
Lt. Governor

TO: Montanans, all officers and agencies of the State of Montana
FROM: Governor Steve Benson
DATE: March 31, 2020
RE: Directive Implementing Executive Order 2-2020 and 3-2020 and providing resources to allow loans to medical and health facilities for operating expenses.

Executive Order 2-2020 and 3-2020 declare that a state of emergency exists in Montana due to the global outbreak of COVID-19 Novel Coronavirus.

Section 10-5-104(2)(a), MCA, authorizes the Governor, during a state of emergency, to "suspend the provisions of any regulatory statute prescribing the procedures for conduct of state business or action or rules of any state agency if the strict compliance with the provisions of any statute, order, or rule would in any way prevent, hinder, or delay necessary actions in coping with the emergency or disaster."

In an effort to meet surge in needed COVID-19 medical services, Montana health facilities have delayed non-critical procedures and pushed back appointments, such as outpatient surgery and physical therapy, which have resulted in a loss of revenue. In addition to losing revenue, Montana health facilities are scrambling for necessary supplies, leading to escalating expenses. While the combination of lost revenue and increasing expenses is difficult for all Montana health facilities, those located in rural Montana face particularly severe impacts. Multiple rural hospitals report having either no cash on hand, or not enough cash on hand to fund operations into April.

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act), signed into law on March 27, 2020, provides leading support for operating expenses. However, even under the CARES Act, funding for Montana health facilities may not arrive for months. Many Montana health facilities have an immediate need for leading support. Waiting for federal funds to arrive puts the health of rural Montanans at risk.

As an important provider of financing for the healthcare sector in the state, the Montana Facility Finance Authority (MFFA) has maintained communication with the healthcare sector in Montana to monitor the scope of COVID-19 impacts on Montana's community health facilities. It has become clear that Montana health facilities need immediate financial support for operating expenses during this crisis.

If the state fails to provide adequate leading support, such as bridge financing, prior to implementation of the CARES Act, Montana health facilities will be unable to purchase supplies, pay staff or remain open during a health crisis. Fortunately, the MFFA has been providing low-cost capital for Montana health facilities for almost 40 years. Accordingly, I find that strict compliance with certain provisions of the Montana Facility Finance Authority Act leading the scope of financing to preclude operating expenses would prevent, hinder, or delay necessary actions in coping with the emergency.

Therefore, in accordance with the authority vested in me under the Constitution, Article VI, Sections 4 and 13, and the laws of the State of Montana, Title 10, Chapter 3 and Title 50, Chapter 1, MCA, and
